

Four All Seasons, LLC is a northwest Iowa company that was started by Delayne Johnson and Galva Holstein Ag, LLC in 2002. They are proud to manufacture an **all-natural fertilizer** for today's "environmentally friendly" individuals and businesses.

From its inception, the company's #1 goal was to create a "**multi-purpose**" fertilizer that could be safely used on lawns, vegetable gardens, and flowers.

Our **Bio-Source Natural Fertilizers** are made from a unique combination of ingredients including dry distiller grains and condensed corn distiller solubles which are end products of the ethanol manufacturing process. So, it's good for your plants, better for the environment, safe for kids to play on, and helps Iowa grain farmers!

Since 2002, sales of **Four All Seasons** have grown, and we are excited that our fertilizers are contributing to greener lawns, more fruitful gardens, and prettier flowers across Iowa and the Midwest.

Our fertilizers do not contain manure, foreign oil, or harsh chemicals.

We use the products and encourage you to try **Four All Seasons** this year!

Can you do this with your fertilizer?

*Four All Seasons is **SAFE** to touch!*

Advantages of Using Four All Seasons:

- ❖ **Nitrogen releases evenly** and will NOT burn plants.
- ❖ **Only 3 pounds is required** for season long coverage on grass so users **save time and money**.
- ❖ **Low phosphorus content** – will NOT leach into nearby streams, rivers or ponds. DNR laws are getting stricter on this!
- ❖ **Contain NO petroleum ingredients** so it will NOT harm the environment.
- ❖ **100% biodegradable.**
- ❖ Corn-based proteins in 11:1:1 fertilizer **hinder weed germination.**
- ❖ **Safety** – gloves and protective clothing are NOT necessary. Kids and pets can play on grass immediately after application.
- ❖ **Easy to Use** – fertilizer can be used in any commercial spreader.
- ❖ **Available** in 5, 30 and 40 pound bags. Volume discounts are available for orders over 2 tons – please inquire.
